# Quarterly Infrastructure Report

## 1 Introduction

This report summarises the infrastructure work completed during the quarter. The new platform improves resilience across our infra-
structure and reduces operating costs significantly.

A second paragraph begins after a visible vertical gap and must be kept separate from the first paragraph in the extracted output.

### 1.1 Scope

The scope covers compute, storage and networking for all internal services.

### 1.2 Priorities

- Migrate legacy services to containers
- Consolidate monitoring dashboards into a single
  view for the operations team

1. Alpha rollout in the staging region
2. Beta rollout in the production region

Throughout the third quarter the team tracked every change carefully and the migration

continued without major incidents across all regions.

# 2 Results

Availability rose to ninety-nine point nine five percent for the quarter.

## 2.1 Outcomes

Costs fell by twelve percent while throughput doubled.
